*Wednesday, November 17, 2021*
TO: BOARD OF EDUCATION

SUBJECT: REAPPORTIONMENT OF SCHOOL DISTRICT VOTING DISTRICTS I, II AND III

Proposed action by the Board of Education:

That the Board of Education approve the Reapportioned School District Voting Districts I, II, and III effective immediately as follows:

VOTING DISTRICT 1: All that portion of the School District South of a line beginning at the Illinois River on Interstate 1-74, northwest on Interstate 1-74 to Madison Street, northeast on Madison Street (including through the vacated section of the 400 block) to Wayne Street, northwest on Wayne Street to Monroe Street, southwest on Monroe Street to Green Street, northwest on Green Street to Glendale, southwest on Glendale to 1-74, northwest on 1-74 to Glen Oak Street to Main Street, northwest on Main Street to the northern most boundary line of the Peoria School of Medicine, southwest behind the school grounds on a line parallel to High Street to Sheridan Road, south on Sheridan Road extended to Dr. Martin Luther King, Jr. Drive, southwest on Dr. Martin Luther King, Jr. Drive to the intersection with Lincoln Street, west on Lincoln Street to the western boundary line of the City's southwest boundary line, and south on that boundary line to the Illinois River.

VOTING DISTRICT II: All that portion of the School District which is north of the boundary line of District I and south of a line commencing at the Illinois River, proceeding west on the east/west line of Lake Street extended, then west on Lake Street to Prospect, south on Prospect to the intersection with Forrest Hill, west on Forrest Hill to North Gale, northwest on Gale to Sterling, to Reservoir Blvd., west on Reservoir Blvd to the west boundary line of the School District.

VOTING DISTRICT III: All of the School District lying north of the boundary line of District II, to the northern most boundary of the School District.

Background:

In conformance with the settlement agreement reached in the Voting Rights lawsuit of 1987, applicable Federal and State statutes and case law, and the pending consent decree of the Federal Court, the School District must review, revise, and adopt new voting district boundaries for the School District's three voting districts using information provided by the decennial census. The 2020 decennial census information is now available to the School District and the proposed voting district boundaries have been constructed to provide a contiguous area; to provide three voting districts which will elect one board member (District I), three board members (District II) and three board members (District III), respectively as required in the pending Court Order; to provide districts of equivalent size based upon voting age population as disclosed by the census; to provide that Voting District I will have a voting age population which will be composed of a majority of minority race voters, to provide compact voting district (non-gerrymandered voting districts). In addition, School voting districts are composed to have easily recognizable boundary lines as much as possible. The mean voting age population (ideal number) of District I is 10,324 voters, the proposed actual number of voting age population is 10,351 or a deflection from the mean of 0.26%. The percentage of black population in District I is 57.49% and the total minority population is 70.22%.
The mean voting age population (ideal number) of District II is 30,973 voters, the proposed actual number of voting age population is 31,013 or a deflection from the mean of 0.13%. The percentage of black population in District II is 32.79% and the total minority population is 46.43%.

The mean voting age population (ideal number) of District III is 30,973 voters, the proposed actual number of voting age population is 30,907 or a deflection from the mean of 0.21% The percentage of black population in District III is 16.28% and the total minority population is 28.04%.

All of these percentages are well within the acceptable percentage limitations as recognized by the Federal courts, and in fact the lowest (i.e., closest to prime) they have been in the past 30 years.

Approved for presentation
to the Board of Education by:
