

Peoria Public Schools COVID-19 Metrics (through Friday, April 30th)

Below are the COVID-19 metrics for Peoria Public Schools. It is important to note that these metrics are pulled through Friday, April 30th and are a snapshot of a moment in time. These numbers will continue to fluctuate on a daily basis.

Our metrics show the active number of staff and student positives in the district along with a percentage highlighting the rate of those positive cases as a part of the total staff in our district and total students taking part in in-person instruction in the district. We have more than 2,000 staff members throughout the district and more than 10,800 students currently doing in-person instruction.

Here are a few definitions to remember as you navigate these metrics.

What is an active positive case? An active positive case is someone we are monitoring who has received a positive test result within 48 hours of the positive test being administered or 48 prior to the symptoms onset prior to the positive test.

What is an exclusion? An exclusion occurs when someone has been possibly exposed to a confirmed positive case, or if they develop a COVID-like symptom, defined as: Fever (100.4°F or higher), headache, shortness of breath, cough, sore throat, vomiting, diarrhea, congestion, new loss of sense of taste or smell, nausea, fatigue, muscle or body aches.

Active Staff Positive Cases	Active Student Positive Cases
13	56

Staff Exclusions (possible exposures and individuals with symptoms, including cough, runny nose, stomachache, etc.)	Student Exclusions (possible exposures and individuals with symptoms, including cough, runny nose, stomachache, etc.)
31	544

Tests Conducted 4/26 – 4/30: 570

Test Positivity: 2.8%

Total Tests Conducted since 1/19: 10,531 Overall Test Positivity: 1.53%
