

## **Operational Services**

### **Naming of School Buildings and Facilities and the Honoring of Individuals**

The Board of Education recognizes the importance to the School District and the community of naming school buildings and other school facilities. It shall be the prerogative of the Board of Education to name all school buildings and facilities and to authorize plaques honoring individuals for their outstanding contributions to public school education.

In exceptional circumstances, portions of buildings or facilities may be used to honor outstanding individuals for their contributions to public education by attaching a memorial plaque. The portion of the building or facility, however, shall not bear a separate name.

All recommendations for the naming of buildings, facilities and the honoring of individuals with plaques shall come to the Board of Education as a recommendation from the Building Committee of the Board of Education.
